Limitation on Wastewater Commodity Charges:

Establishment of Sewer Base:

***Small Users Quarterly:** Any quarterly wastewater customer that uses less than 200m³ of water during the "winter quarter" (Nov. – Mar.) shall be given a sewer base during the remaining three quarters. The sewer base will be based on the actual usage during the winter quarter however, the maximum quantity billed for shall not exceed 120% of the sewer base established in the winter quarter.

***Small Users Monthly:** Any wastewater customer whose maximum monthly metered water consumption is less than 66m³ during the winter months (Nov. – Apr.) shall be given a sewer base during the remaining six months. The sewer base will be based on the actual usage during the winter months however, the maximum quantity billed for shall not exceed 120% of the sewer base established in the winter months.

Large Users: Customers whose metered water consumption exceeds the above limits shall be billed based on actual metered water for all water used.

Special Sewer Metering: Customers with their own water supply require special metering or billing arrangements by ordinance. "Large users" disposing of some wastewater by other than the City wastewater system need special metering arrangements to correctly bill the sewer service. These arrangements are the responsibility of the customer and are subject to prior approval of the Wastewater Division.

How a Bill is Calculated:

The amount shown on the bill for water and for sewer includes an availability fee and a commodity charge.

Sample Billing Calculation

Quarterly residential customers inside the city with 5/8" meter using 70m³ of water, Schedule "A".

<u>Water</u>			
Availability Fee, 5/8"	=		\$30.70
Residential Commodity Charge			
City = .496 per m ³			
70m ³ X .496	=		\$34.72
Total Water	=		\$65.42
<u>Wastewater</u>			
Availability Fee, 5/8" meter	=		\$9.41
Residential Commodity Charge			
City = .544 per m ³			
70m ³ X .544	=		\$38.08
Total Sewer	=		\$47.49
Total Charge	=		\$112.91
Water & Wastewater	=		\$112.91

Collection Policies: Charges for water and sewer are due 21 days after the billing date. After the due date the "gross" amount shown on the bill must be paid, which includes a 5% penalty. Accounts become delinquent 45 days after billing, and service may be discontinued until the bill and \$60 collection fee are paid.

Availability Fee & Minimum Charge: This is a fee charged to all active accounts, even if there is no usage. It covers the cost to read and maintain the meter and to process the utility bill, while the service is on and available for use. This charge will be discontinued only when the customer responsible for the account requests the water to be turned off.

Meters: Meters for water customers are furnished and maintained by the City Utilities without charge. Only one customer's name is permitted on a single service. The size of the meter is determined by the Utility, based on peak demand flow required by the customer.

Township Surcharges: A township may elect to impose a Utility Improvement Surcharge. The City of Kalamazoo is contractually obligated to collect and forward the fee to the township office. Any questions regarding this improvement surcharge should be directed to the township office.

Surcharges: Wastewater of unusual strengths and characteristics will be charged special surcharges, according to ordinance. Questions on the application and interpretation of surcharges should be referred to the Wastewater Division, (269) 337-8157.

Billing Units

Kalamazoo's water meters measure in metric units. The billing unit is the cubic meter (m), which is equal to 264.2 gallons. Conversion to other measurements are shown below:

1 cubic meter (m)	=	1,000 liters
1 cubic meter (m)	=	.3531 x 100 cubic feet
1,000 gallons	=	3.785 cubic meters
100 cubic feet	=	2.832 cubic meters
